PROFESSIONAL SUMMARY

MCA graduate (2026) working as a Full Stack Developer at ATmega, a software startup, building live client websites and AI-powered applications. Skilled in React.js, Next.js, Node.js, Express.js, Python, FastAPI, JavaScript, TypeScript and SQL, with experience in REST API development, Firebase and MongoDB databases, authentication, and responsive UI design.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Tools: Git, GitHub, Postman, Firebase, MongoDB, MySQL, Vercel

Testing: Software Testing, Debugging, API Testing, Data Validation, Test Case Documentation,

PROFESSIONAL EXPERIENCE

Software Developer — ATmega (Software Startup) *4 Months | Ongoing*

- Build and deliver live client and AI projects, from development and API integration to debugging, testing and data validation.
- Integrate REST APIs, Firebase and Supabase databases and AI APIs; investigate issues and validate data across projects (see Projects).

Web Developer Intern — Infotact Solutions *Remote (Online) | 3 Months*

- Built and **tested** full-stack healthcare and restaurant applications using React.js, Node.js, Express.js, MongoDB and Git.
- Integrated REST APIs and database workflows; **validated data**, investigated defects and **debugged** application issues to resolution.
- Documented technical workflows, test steps and troubleshooting procedures; collaborated in a 3–4 member Agile team using Git/GitHub.

PROJECTS

RAG Chatbot — Python, FastAPI, Next.js, Supabase, pgvector, Gemini LLM

- Built an AI chatbot with PDF ingestion, text chunking, vector embeddings and semantic search for document retrieval.
- Integrated APIs and vector search; debugged data-query workflows and verified response accuracy.

Automatic Code Documentation Generator — React.js, Gemini API, LangChain

- Developed an AI-powered tool generating code documentation, summaries, PDFs and presentations from source code
- Integrated OpenAI and Gemini APIs for automated technical documentation and document processing.

SVO Bio Tech E-Commerce Platform — React.js, Firebase, Cloudinary

- Developed product and inventory features with authentication, CRUD operations and dynamic data management.
- Resolved database and authentication issues; validated real-time data flow between Firestore and Cloudinary.

Krishna Oil Mill E-Commerce Website — Next.js, Firebase, Tailwind CSS

- Implemented Firebase Authentication and Firestore for secure user access and product data management.

Dream Replicas Photography Website — Next.js, TypeScript, Tailwind CSS, shadcn/ui, Firebase, Cloudinary

- Built a responsive website for a wedding and commercial photography studio in Erode (Home, About, Services, Gallery, Contact) with an admin panel to manage gallery photos, services and videos;
- Integrated Firebase Firestore and Authentication and Cloudinary image uploads.

EDUCATION

Master of Computer Applications (MCA) — Rathinam Technical Campus, Anna University ***2024–2026***

B.Sc. Computer Science — Vivekanandha Educational Institutions, Namakkal ***2021–2024***

CERTIFICATIONS

- IBM Web Development Certification **(IBM)**
- Python Internship **(IPCS Global)**
- NPTEL Python Certification
- Web Development **(Infotact Solutions)**
- English Typewriting – Junior Grade & Senior Grade (Passed)
